Surakarta, Indonesia | imamismail157@gmail.com | +6281329127165 | [Portfolio](#) | [Linkedin](#)

Backend Developer with 5+ years of experience building scalable systems using .NET, Node.js, and PHP. Strong in REST & GraphQL APIs, microservices architecture, asynchronous processing, and database optimization across SQL Server, PostgreSQL, and MySQL. Proven track record in enterprise ERP, e-commerce, pricing systems, and CRM platforms, delivering reliable systems with measurable performance and data integrity improvements.

Professional Experience

PT Astra Graphia Information Technology (AGIT) – Jakarta

Feb 2026 – Present

.NET Developer | Microservices Applications Development (Assigned to PT Astra International)

- Developed scalable RESTful and GraphQL APIs using .NET Core, supporting finance, inventory, and HR ERP modules used by multiple internal departments.
- Improved data retrieval performance by implementing Redis caching and Elasticsearch search, reducing response time and improving user experience for operational teams.
- Designed and enhanced microservices architecture to increase modularity, deployment flexibility, and long-term maintainability across backend services.
- Collaborated with QA and frontend teams to resolve production issues, improving system stability and release quality in enterprise environments.

PT Rapid Teknologi Indonesia – Jakarta

Jul 2023 – Jan 2026

.NET Developer (Assigned to PT Astra International)

- Developed scalable RESTful and GraphQL APIs using .NET Core, supporting finance, inventory, and HR ERP modules used by multiple internal departments.
- Improved data retrieval performance by implementing Redis caching and Elasticsearch search, reducing response time and improving user experience for operational teams.
- Designed and enhanced microservices architecture to increase modularity, deployment flexibility, and long-term maintainability across backend services.
- Collaborated with QA and frontend teams to resolve production issues, improving system stability and release quality in enterprise environments.

PT Rapid Teknologi Indonesia – Tangerang Selatan

Mar 2023 – Jun 2023

Co-Trainer – .NET Developer Bootcamp

- Mentored bootcamp participants on C#, .NET Core, REST APIs, and microservices fundamentals, supporting hands-on project development.
- Guided teams in building a microservices-based e-wallet application, including service communication and message queues.
- Reviewed code and architecture designs, improving participants’ understanding of scalable backend systems.

PT Rapid Teknologi Indonesia – Jakarta

Dec 2021 – Feb 2023

Backend Developer – B2C E-Commerce (Assigned to PT Astra Otoparts “Rejuvenate”)

- Developed and maintained REST APIs for a B2C e-commerce platform supporting warehouse and customer operations.
- Optimized PostgreSQL queries and database structure, improving API performance and data reliability.
- Enhanced admin warehouse and user profile modules, improving operational workflows and data accuracy.

PT Rapid Teknologi Indonesia – Jakarta

Jun 2021 – Dec 2021

Backend Developer | Co-Team Lead (Assigned to PT BRI)

- Developed CRM backend modules using CodeIgniter, SQL Server, AJAX, and jQuery, supporting customer and pipeline management across BRI branches.
- Led task planning and code reviews as co-team lead, improving delivery consistency and code quality.
- Collaborated with internal stakeholders to gather requirements and deliver features within sprint timelines.

PT Rapid Teknologi Indonesia – Jakarta

Dec 2020 – May 2021

PHP Application Operations (Assigned to PT Toyota Astra Motor)

- Maintained and monitored PHP applications to ensure system uptime and data integrity.
- Supported backend operations using Laravel, CodeIgniter, and SQL Server, resolving production issues efficiently.

PT Netindo Solution Group – Yogyakarta

Oct 2019 – Nov 2020

- Developed backend systems using CodeIgniter and MySQL for multiple client applications.
- Built secure RESTful APIs for internal and external integrations.
- Implemented a custom MLM bonus calculation system, handling member hierarchy and dynamic commission logic.

Education

Universitas AMIKOM Yogyakarta- Bachelor of Informatics

2015 - 2019

- GPA: 3.19/4.00

Skills

Languages & Frameworks: .NET Core, Node.js, PHP (Laravel, CodeIgniter)
Architecture: REST API, GraphQL, Microservices
Messaging & Caching: RabbitMQ, Kafka, Redis
Databases: SQL Server, PostgreSQL, MySQL
DevOps & Tools: Docker, Kubernetes
Others: AJAX, jQuery
